ALOUAN AYOUB

Java Full-Stack Developer – Spring Boot

Technologies : Microservices | Angular | React | AWS | Docker

Phone : +212 652-634-966 | **Email :** alouanayoub3@gmail.com | **LinkedIn :** ayoub alouan

Mobility: Nationwide (Morocco) | **GitHub :** ALOUAN01 | **Portfolio :** bit.ly/ayoub-portfolio

Professional Profile

Java Full-Stack Developer specialized in designing applications based on **Spring Boot** and **microservices** architectures. Experience in large-scale data processing (500K+ leads/day), application security using **Keycloak/RBAC**, and containerized deployment with **Docker** and **AWS**. Development of modern interfaces using **Angular** and **React** for high-performance and scalable systems (up to **1000 req/min**).

Technical Skills

- **Backend & Architecture :** Java (8/11/17), Spring Boot, Spring Cloud, Microservices, REST APIs, Spring Security, JPA/Hibernate, Keycloak (SSO/RBAC), Maven.
- **Frontend :** Angular (12+), React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **Cloud & DevOps :** Docker, Docker Compose, Jenkins (CI/CD), AWS (EC2, S3, Lambda, API Gateway), Git, GitHub.
- **Data & AI :** ETL Pipelines, Python (Pandas, Flask), Elasticsearch, LLM APIs (OpenAI/ChatGPT), Data Visualization.
- **Databases :** PostgreSQL, MySQL, SQL Server, Redis (Caching).
- **Testing & Quality :** JUnit 5, Mockito, Postman, Selenium, SonarQube.
- **Methodologies :** Agile / Scrum.

Professional Experience

IAWEB.DEV – Havet Digital — Marrakech
Java Full-Stack Software Engineer (Final Year Internship + Full-time position) — Mar. 2025 – Dec. 2025

DataPull – Scalable B2B/B2C prospecting platform based on data and AI

- Design and development of the **Spring Boot backend core** using a **microservices architecture** (Gateway, B2B, B2C, Users) supporting up to **1000 req/min**.
- Implementation of **application security with Keycloak** (RBAC, JWT).
- Development of **ETL pipelines** for processing and enriching **500K+ leads/day**.
- Design of a **real-time search architecture** based on **Elasticsearch and PostgreSQL**.
- Development of the **React frontend** (analytics dashboards, advanced filters, exports).
- Development of a **multi-agent service** and a **Python backend (Flask)** exposing **REST APIs** for prospecting and orchestration.
- Integration of **language models (ChatGPT)** for user query analysis and intelligent search.
- **Containerization and deployment** on **AWS (EC2, S3)** with **Docker**, and backend performance optimization (**response time < 150 ms**).

Court of Appeal — Marrakech
Web Developer – Internship — Jul. 2024 – Sep. 2024

- Full-stack web application **(Spring Boot + Angular)** for a centralized leave management system serving **200+ employees**.
- Workflow automation: **requests, approvals, notifications, statistics**.
- Reduced administrative processing time by **60%** and eliminated manual errors.

EKBlocks — Marrakech
Web Developer – Internship — Jul. 2023 – Sep. 2023

- Development of a school management application **(Django + React)**.
- Modules: enrollment management, classes, and teachers.

Education

Engineering Degree in Computer Science and Networks — EMSI – Marrakech (2020–2025)
Certifications : Java Microservices (Spring Boot & Spring Cloud), Machine Learning (Python), Git/GitHub, DevOps.

Personal Projects

- **AI Design Pattern Recommender – Spring Boot / Angular / Django :** Application using the Gemini API to analyze code and automatically recommend suitable design patterns.
- **OCR Identity Extraction – Spring Boot / Angular / Django :** Web application integrating Tesseract / Google Vision for automatic identity data extraction and validation.

Languages

- **Arabic** : Native
- **French** : Fluent
- **English** : Advanced
