Professional Profile

State Engineer in **Computer Science and Networks**, specialized in **Java Full-Stack** development with professional experience in designing **Spring Boot** applications and **microservices** architectures. Skilled in frontend development with **Angular/React**, **SQL** databases, application security, **Docker**, and **AWS**. Also experienced in integrating **AI** solutions and developing **REST APIs**.

Technical Skills

- **Backend & Architecture:** Java SE (17/21), Java EE / Jakarta EE, Spring Boot, Spring Cloud, Microservices, REST APIs, Spring Security, JPA/Hibernate, JDBC, Keycloak (SSO/RBAC), Maven, JUnit, Mockito.
- **Frontend:** Angular (17+), React.js, TypeScript, JavaScript, Tailwind CSS.
- **Environnements & DevOps:** Linux, Docker, Jenkins (CI/CD), AWS, Git/GitHub.
- **Databases & Data:** PostgreSQL, Oracle SQL/PLSQL, MySQL, Elasticsearch, ETL.
- **Methodologies:** Agile / Scrum.

Professional Experience

IAWEB.DEV – Havet Digital Marrakech
Java Full-Stack Software Engineer – Permanent Contract Aug. 2025 – Dec. 2025

- Finalization, stabilization, and production deployment of the **DataPull** platform, with **Docker containerization** and deployment on **AWS (EC2, S3)**.
- **Multi-agent prospecting application:** Development of an application for **lead generation from natural language queries**.
- Integration of the **ChatGPT API** to analyze user needs and orchestrate the different search stages.
- Development of the **Python / Flask** backend consuming **DataPull APIs** to retrieve relevant leads.
- Design and development of the **frontend with Next.js**.

Java Full-Stack Developer – Final-Year Internship Mar. 2025 – Aug. 2025
DataPull – Scalable B2B/B2C prospecting platform based on data and AI

- Design and development of the **Spring Boot backend core** based on a **microservices** architecture (Gateway, B2B, B2C, Users), supporting up to **1000 req/min**.
- Implementation of **application security with Keycloak** (RBAC, JWT).
- Implementation of **ETL pipelines** for processing and enriching **500K+ leads/day**.
- Design of a **real-time search architecture** based on **Elasticsearch and PostgreSQL**.
- Development of the **React frontend** (analytical dashboards, advanced filters, exports).

Court of Appeal Marrakech
Web Developer – Internship Jul. 2024 – Sep. 2024

- Development of a leave management application for **200+ employees using Spring Boot, Angular, and SQL Server**.
- Workflow automation: **requests, approvals, notifications, and statistics**.

Education

State Engineering Degree in Computer Science and Networks EMSI – Marrakech (2020–2025)
Certifications: Java Microservices - Spring Boot & Spring Cloud | Machine Learning | Git/GitHub | DevOps.

Personal Projects

- **AI Design Pattern Recommender – Spring Boot / Angular / Django:** Application using the Gemini API to analyze code and automatically recommend design patterns.
- **OCR Identity Extraction – Spring Boot / Angular / Django:** Web application integrating Tesseract / Google Vision for automatic extraction and validation of identity data.
